

Digi 3000

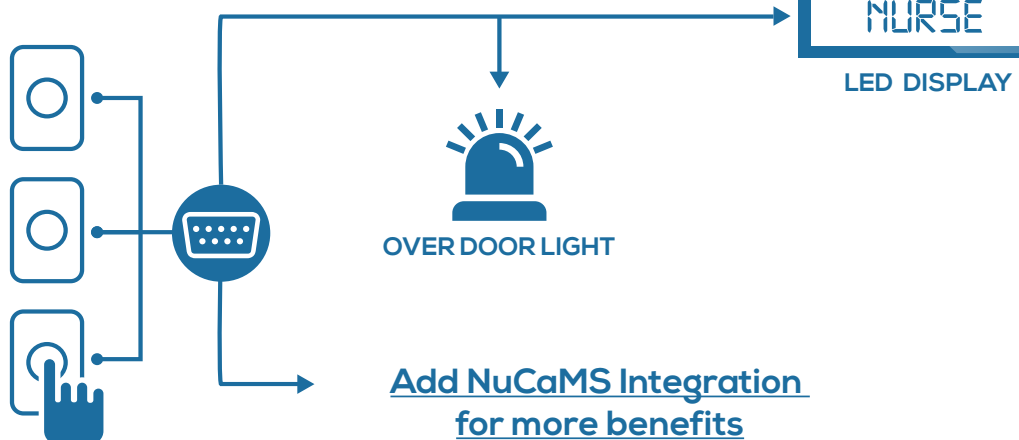

HARD-WIRED

- ▶ This system provides a cost effective, highly featured nurse call system that can be used on existing wiring or a structured cabling system.

CALL POINTS

Standalone

Our proprietary **Digi3000 Series** is AS3811 compliant. This system uses RS485 for fast, reliable alerting.

The programmable Call Points support multiple call types, featuring backlit buttons with braille support and are easy to clean.

Call Points are available with optional accessory sockets, or in a Weatherproof (IP65) version for use in Wet Areas.

The Digi3000 Series includes easy to read Tri-Colour 14-character LED displays, annunciators, and Over Door Lights which can display 7 colours for visual indication of Call Location.

A range of JCT accessories including patient entertainment handsets, light controls, corded or wireless pendants, bed and chair mats, as well as third party accessories can interface directly in to the Call Point.

SYSTEM AND WIRING

AS3811 Compliant
RS485 Star or Bus, with Daisy Chain capabilities

Add NuCaMS Integration for more benefits

► Nurse Call Management System and Assistive Technologies

JCT Healthcare's Integrated System – Improves Quality of Care, Wellbeing of Patients and Staff, and Increases Operational Efficiencies

NuCaMS enhances our Nurse Call Hardware Series by offering extensive features to meet the evolving needs of modern healthcare providers.

NuCaMS is a centralised software platform built to be highly secure, scalable and flexible to integrate into JCT and Third-Party Systems.

NuCaMS modular design allows features to be added as budgets or operational requirements change.

Improved Care Outcomes:

- Increased Access to Information
- Targeted Information Flow Which Reduces Alarm Fatigue
- Enhanced Response Times
- Better Staff Management
- Adaptable Patient Care
- Unified KPI Reporting

Modular Technology Innovations:

- Customised Workflows
- Mobile Apps
- Voice Communications
- Duress Solution
- IoT Device Integration

Flexible Integrations:

- JCT systems Digi 3000, PoE 4000, Wireless 1000, BLE 5000
- Fire, Security, Building Management Systems
- Communication Devices. Email, SMS, Pagers, DECT

Enterprise Ready Architecture:

- Modern Web-Based Critical Messaging Platform
- Encrypted Communications
- Onsite Single or Multisite Connectivity & Management
- High Availability Option
- Built-in Backup Solution
