

# PoE 4000

TRUE IP

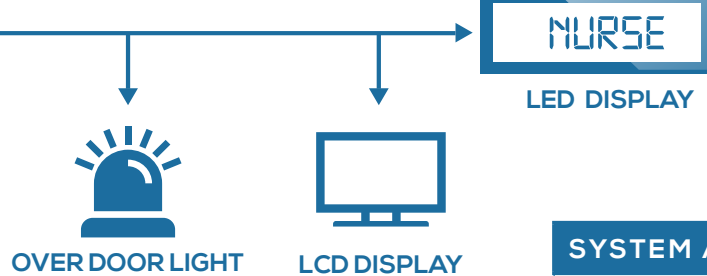

▶ This True IP system streamlines maintenance, to easily monitor all devices on the network, and reduces ongoing costs.

CALL POINTS

Standalone

Add NuCaMS Integration for more benefits

Our True IP series, **PoE 4000** is compliant with PoE standards IEEE 802.3af. This system uses IP networking to centralise monitoring and notifications of each device. Each device can be centrally programmed when using NuCaMS to update Firmware and configuration of the device.

The programmable Call Points support multiple call types, feature backlit buttons with braille support and are easy to clean. Call Points are available with optional accessory sockets, or in a Weatherproof (IP65)

version for use in Wet Areas. And intercoms for communication between patient and staff.

The PoE 4000 Series includes easy to read Tri-Colour 12-character LED displays, annunciators, and Over Door Lights which can display 7 colours for visual indication of Call Location.

A range of JCT accessories including patient entertainment handsets, light controls, corded or wireless pendants, bed and chair mats, as well as third party accessories can interface directly in to the Call Point.

## SYSTEM AND WIRING

PoE Standards IEEE 802.3af and RCM Compliant

Cat5e or above cabling with Daisy Chain capabilities

Centralised power supply management for PoE devices

Remote Device Monitoring and Notification

Software configurable call types and priority

Static or Dynamic IP addressing

Firmware updating over the network

## ALERTS

Visual Lights

Station & Corridor Displays

Audio Tones

# Add NuCaMS Integration for more benefits

## ► Nurse Call Management System and Assistive Technologies

### JCT Healthcare's Integrated System – Improves Quality of Care, Wellbeing of Patients and Staff, and Increases Operational Efficiencies

NuCaMS enhances our Nurse Call Hardware Series by offering extensive features to meet the evolving needs of modern healthcare providers.

NuCaMS is a centralised software platform built to be highly secure, scalable and flexible to integrate into JCT and Third-Party Systems.

NuCaMS modular design allows features to be added as budgets or operational requirements change.

#### Improved Care Outcomes:

- Increased Access to Information
- Targeted Information Flow Which Reduces Alarm Fatigue
- Enhanced Response Times
- Better Staff Management
- Adaptable Patient Care
- Unified KPI Reporting

#### Modular Technology Innovations:

- Customised Workflows
- Mobile Apps
- Voice Communications
- Duress Solution
- IoT Device Integration

#### Flexible Integrations:

- JCT systems Digi 3000, PoE 4000, Wireless 1000, BLE 5000
- Fire, Security, Building Management Systems
- Communication Devices. Email, SMS, Pagers, DECT

#### Enterprise Ready Architecture:

- Modern Web-Based Critical Messaging Platform
- Encrypted Communications
- Onsite Single or Multisite Connectivity & Management
- High Availability Option
- Built-in Backup Solution
